I. Academic Master's training offer

Master Definitional Framework

2. framework and goals of training:

1- Access conditions:

- International relations Licence (political sciences).

- Public Law Licence (Law).

3. Training goals:

This training, which fits the international relations and public law discipline and includes public international law, is designed to find a class research students in different fields of international cooperation, whether economic, security or political, as the student will be able to be familiar with the basics and the reality of international cooperation, and acquire

multiple knowledge based on several courses qualifying him to work in different institutions and bodies interested in international cooperation issues, whether public or specialized.

The importance of the specialization lies in enabling the student to understand the nature of international relations, comprehend the issues of globalization and global governance, and recognize the importance and role of international bodies and non-international actors in supporting international cooperation in the areas of the environment, new security challenges, and peacebuilding, thus contributing to ensuring global security and peace.

4. Targeted Qualifications and capacities: To obtain a Master's degree in Academic Education, specializing in International Cooperation, means that a student has acquired knowledge and skills that enable him to understand and analyze the dynamics of international relations built within their cooperative or conflictual frameworks. In general, the acquired gains and skills can be identified as follows:

- * The ability to understand and analyze international, regional, and national events as they influence each other.
- * Acquire an understanding of decision-making mechanisms within international cooperation organizations, institutions, and bodies.
- * Enable students to engage in conscious, serious, and purposeful practice related to the field (their ability to work for the Ministry of Foreign Affairs, international and regional organizations, international financial institutions, etc.) .
- * Possibility of joining research centers specialized in various fields of international cooperation.
- * Developing the scientific research base and the ability to pursue postgraduate studies in the field, and thus the possibility of providing supervision and providing the specialized competencies and skills needed by the university or any other institution or body.

5. Regional and national capacities for diploma holders recruitment

The major of international cooperation is one of the academic fields that allows students having obtained a master's degree to enter the world of work and employment in many employment agencies, whether public or private, national, regional, or international. Among these employment opportunities are the following:

- The Ministry of Foreign Affairs and its affiliated bodies
- The Presidency and its affiliated bureaus
- The Ministry of Finance
- The Ministry of Trade
- The Ministry of Defense and security institutions
- Diplomatic and consular missions
- Embassies and consulates accredited in Algeria
